

Article processing charges (APCs)

Atmospheric Chemistry and Physics is committed to the open-access model of publishing. This ensures free web access to the results of research and maximum visibility for published papers. However, it requires the author or a supporting institution to pay the costs of the review process, typesetting, web publication, and long-term archiving. These article processing charges are categorized according to the submitted material and levied as follows:

- If the discussion paper is published **before 31 December 2015** the APCs are levied for the publication in the discussion forum, whereas the publication in the journal is then free of charge.
- If the discussion paper is published **after 1 January 2016** the APCs are levied for the publication of the final revised paper in the journal. The publication in the discussion forum is free of charge.
