

Article processing charges (APCs)

Earth Surface Dynamics is committed to the open-access model of publishing. This ensures free web access to the results of research and maximum visibility for published papers. However, it requires the author or a supporting institution to pay the costs of the review process, typesetting, web publication, and long-term archiving. These article processing charges are categorized according to the submitted material and levied as follows:

- If the discussion paper is published **before 31 December 2015** the APCs are levied for the publication in the discussion forum, whereas the publication in the journal is then free of charge.
- If the discussion paper is published **after 1 January 2016** the APCs are levied for the publication of the final revised paper in the journal. The publication in the discussion forum is free of charge.

| | Price per journal page | Description |
|-------------------|------------------------|---|
| Category 1 | currently waived | LaTeX submissions using the Copernicus Publications LaTeX Package |
| Category 2 | currently waived | Word submissions using the Copernicus Publications Word Template |
| Category 3 | currently waived | LaTeX submissions causing higher expenditure of work due to any LaTeX style and/or difficulties with tables/figures |
| Category 4 | currently waived | Word submissions causing higher expenditure of work due to any Word style and/or difficulties with tables/figures |

What is included in the article processing charges?

- all online tools for authors and reviewers;
- professional processing of figures;
- typesetting, editing, and formatting in PDFLaTeX;
- English language copy-editing for final revised papers;
- immediate open-access publication of each article;
- article alert service;
- inclusion in the Copernicus Online Library;
- indexing in international scientific databases and reference services;
- long-term e-archiving via Portico and CLOCKSS as well as printed archiving via copyright libraries worldwide.
